SUMMARY

Software Developer with over 2 years of experience building production-ready applications. Proven success delivering SaaS and e-commerce platforms using Next.js, TypeScript, React, and TailwindCSS. Strong collaborator with contract and independent project experience, skilled at translating design into scalable user interfaces.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript/TypeScript
- **Frontend:** React, React Native, Next.js (App Router), TailwindCSS, Zustand
- **Backend:** Node.js, Express.js, Prisma, PostgreSQL, MongoDB
- **Auth & APIs:** NextAuth, JWT, Google OAuth, Gemini API, Stripe, Resend, UploadThing, Printful API
- **DevOps & Infra:** AWS S3, CloudFront, Google Cloud, Neon, Docker, Vercel, Supabase
- **Tools & Libraries:** Git, Figma, pgAdmin, Trello, Jira, Linux, Windows, VS Code
- **AI & Productivity:** Github Copilot, GPT Codex, Claude, Gemini, other LLMs for coding assistance, documentation, and automation

PROFESSIONAL EXPERIENCE & PROJECTS

Nsanity.shop – Founder & Full-Stack Developer   April 2025 – October 2025

Full-featured e-commerce storefront featuring 44 print-on-demand products, with a conversion-focused UX and maintainable admin portal for publishing and management.

- Developed a complete platform using Next.js (App Router), TypeScript, Prisma, MongoDB, and deployed on Vercel.
- Integrated Stripe API and webhooks for orders and Printful API for automated fulfillments and store syncing.
- Built a full admin panel with product management and a drag-and-drop mock-up editor for artwork uploads, positioning, and resizing.
- Implemented NextAuth (credentials and Google OAuth) with JWT sessions, persistent cart and favourites synced via React Context, local storage, and database.
- Integrated Gemini-powered Chatbot using Google Cloud services; implemented UploadThing for media handling and Resend for email operations.

Woof – Front-End Developer (Contract)   October 2024 – June 2025

Crypto tax and transaction tracking and tax management SaaS platform for managing multi-chain wallet transactions (contract role with startup).

- Led TypeScript-based frontend development across multiple Next.js repos, collaborating with engineers to deliver pixel-perfect, responsive UI from Figma across 5 blockchain networks.
- Built a 5-page marketing site (Home, About, Pricing, Benefits, FAQ) and completed authenticated dashboard interface.
- Implemented core product systems: contacts management for labelling wallet addresses with auto-populate, and custom transaction categories spanning multiple taxonomies.
- Developed comprehensive settings for managing connected wallets and adding/removing supported blockchain networks, plus a global theme provider with light/dark mode.
- Integrated frontend with backend APIs via Docker environments and PostgreSQL using Prisma, Neon, and pgAdmin.

Pantheras – Web Developer (Freelance)   March 2023 – October 2024

Worked with local businesses to design and launch websites and lightweight apps.

- Delivered custom-built, responsive websites using React, Next.js, and TailwindCSS.
- Integrated contact forms, booking systems, and local SEO strategies.
- Provided clients with user-friendly Admin portals where they can post images, products, and complete CRUD operations using MongoDB, Prisma, AWS S3, and CloudFront.
- Balanced multiple projects and maintained ongoing client support relationships.

CERTIFICATIONS

- Frontend Engineer Professional Certificate – Codecademy, 2024

SOFT SKILLS

- Strong communicator who collaborates effectively across technical and non-technical teams.
- Direct and detail-driven problem solver focused on practical, high-quality solutions.
- Balances product vision with clean, scalable technical execution.
- Learns quickly and loves experimenting with new tools and approaches.
